

ThyssenKrupp Kubria® Cone Crusher

Kubria® cone crushers are high-class technology for medium and fine crushing of hard rock.

Its modular design makes the Kubria® cone crusher a versatile and economic machine. All models in each series have identical bottom shells and bearings, hydraulic systems, drive assemblies and accessories.

Application fields are the production of ballast and chippings in the natural rock and gravel industry, ore mining, lime and cement industries and refractory industry.

The advantages of the Kubria® cone crusher are convincing:

- high output
- high degree of comminution
- cubic product
- low operating and wear part costs
- easy to convert to other feed and product sizes
- change of stroke by exchanging eccentric bush
